Personal Note

After several years in R&D leadership roles, as my role was recently impacted by a large-scale layoff, making me available for my next challenge I am now seeking a hands-on software developer position.

In my recent positions as a leader, I devoted a significant part of my time to hands-on work, approximately 70% of my time.

I am passionate about building high-quality software and excited to return to a role where I can focus on coding, solving technical challenges, and contributing directly to product development.

Summary

Experienced highly skilled R&D team leader, looking for my next challenge as Scrum Master Team Leader, offers customer facing and tremendous can-do approach, while leading teams to best results.

- Customer facing experience as a Solution Architect, defining Customer needs, design development end to end process up to full implementation on customer site.
- Designing and implementing micro-services architecture, AWS & Azure cloud-based technologies
- Proactive and quick decision maker.
- Initiative, creativity, high level interpersonal skills.
- Excellent interaction with internal and external customers.
- Integrated modern AI-powered IDEs (Cursor IDE) into development workflow for enhanced productivity.

Major Accomplishments

- Dismantling and re-implementation of an old ASP.NET MVC legacy system for a micro-service architecture in a short time. Initiate and drive automatic process management system which within two months of development saved purchase of a one million dollar 3rd party application.
- Develop variant infrastructure components, finding innovative and scalable solutions to challenging requirements, making one standard, supplying generic features for all screens along the system.
- Initiate extension of Gantt system, giving all units, both developers as managers level the ability to track support & roadmap projects all in one screen, decrease overhead for managerial monitoring task allocation.

WORK EXPERIENCE

2025 - RefereeX.com - Building a service, developed in python, for sending notification for Israeli Football Referees integrated with Meta WhatsApp service

2023-2024: R&D Team Lead & Scrum Master – Veritone (before Pandologic)
