Professional Summary**

Highly skilled and passionate R&D professional with extensive experience in software development, architecture, and system design, now seeking a hands-on Software Developer position. While holding leadership roles, I consistently maintained a significant hands-on coding contribution (up to 70% of my time), demonstrating a deep commitment to technical excellence and product delivery. My background includes architecting and implementing microservices, leveraging AWS and Azure cloud platforms, and migrating complex legacy systems. I am eager to apply my strong technical acumen, problem-solving skills, and agile methodology experience to directly build high-quality, scalable software solutions.

Technical Skills**

Languages:** C#, .NET (.NET Core, .NET 6, ASP.NET MVC, .NET Framework), Python, Node.js, JavaScript, PL/SQL

Cloud Platforms:** AWS (EC2, SQS, SNS, ECS, ELB, Lambda, DynamoDB, VPC, CloudWatch, API Gateway, SSM, DMS, CI/CD Automation), Azure

Databases:** MS SQL, Redis, DynamoDB, PostgreSQL, Oracle

Messaging/Queues:** RabbitMQ, AWS SQS, AWS SNS

Tools & Technologies:** Microservices Architecture, Dependency Injection, CI/CD (Azure DevOps), Docker, Git, Angular, HTML, CSS, Cursor IDE (AI-powered)

Methodologies:** Agile (Scrum Master experience), End-to-End System Design, Solution Architecture

Major Accomplishments**

Led the dismantling and re-implementation of a complex ASP.NET MVC legacy system into a robust microservices architecture within a tight timeframe.

Initiated and developed an automatic process management system that saved the company a \$1 million investment in a 3rd party application within two months.

Designed and developed innovative and scalable infrastructure components, establishing a standardized framework that provided generic features across multiple system screens.

Developed an extension for the Gantt system, enabling both developers and managers to track support and roadmap projects on a single screen, significantly reducing managerial monitoring overhead.

Work Experience**

2025 – Present: RefereeX.com – Independent Project**

Designed and developed a Python-based service for sending notifications to Israeli Football Referees, integrated with Meta WhatsApp service.

2023 – 2024: R&D Team Lead & Scrum Master – Veritone (before Pandologic)**

Contributed hands-on to development efforts (30% of time) for mission-critical services integrated with key customers and 3rd party vendors within the HR Tech domain.

Developed and maintained solutions in .Net, .Net Core, C#, MS SQL, Redis, DynamoDB, and utilized AWS SQS, EC2, RabbitMQ, and Azure DevOps for CI/CD.

Monitored, improved, and maintained production servers, ensuring high availability and performance.

2022: R&D Team Leader & Scrum Master – 888 Holdings**

Developed new components and led the transition from legacy monolith systems to a microservices architecture.

Utilized .Net6, .Net Core, ASP.NET C#, Node.js, MS SQL, Redis, and implemented various AWS services in development.

Provided technical guidance and managed offshore developers.

2019 – 2021: R&D Team Leader & Scrum Master – Align Technologies**

Played a key hands-on role in the company's transition to a microservices architecture on a serverless AWS infrastructure.

Developed extensively in .Net Core, ASP.NET C#, MS SQL, PostgreSQL, Redis, and DynamoDB, leveraging a wide range of AWS services including ECS, ELB, SQS, SNS, EC2, SSM, DMS, Lambda, CloudWatch, API Gateway, VPC, CI/CD, and Automation.

Innovated R&D support activities for production environments and managed offshore development teams.

2019: R&D Senior Programmer/DevOps – Gimmonix**

Full Stack Developer within a DevOps team, focusing on cross-platform microservices systems.

Designed and implemented microservices architecture, integrating AWS & Azure cloud-based technologies, Dependency Injection principles, and RabbitMQ message broker.

Developed web applications using Angular, HTML, JavaScript, and CSS.

2007 – 2017: R&D Team Leader & Developer – SintecMedia**

Performed 10 years of full-stack hands-on software development, contributing approximately 50% of time to coding.

Developed critical system components in .Net C# and Oracle using PL/SQL.

Served as a Solution Architect for a core system module, guiding technical design and implementation.

Led all software aspects of projects from research, planning, architecture, design, and implementation through to testing and deployment.

Managed multiple projects concurrently and provided client on-site support and business reviews.

Community Activity**

2002 – 2017: Football Club General Manager – Shikun Vatikim Ramat-Gan**

Managed all financial and bureaucratic procedures for a semi-professional football club in the Israeli Football Federation.

Education**

B.Sc. in Computer Science, 2001** | The Open University
