

Guy Shachar - CV - Software Engineer [Mobile: 054-7799979](tel:054-7799979) | [eMail: guyshachar.acc@gmail.com](mailto:guyshachar.acc@gmail.com) | [LinkedIn](#) **Personal Note**

With extensive hands-on experience in software development for complex multidisciplinary systems, primarily with .NET technologies, I am actively seeking a dedicated Software Engineer position. My recent R&D leadership roles involved a significant hands-on component (approximately 70%), where I focused on building high-quality ground-based software, creating engineering tools, and solving technical challenges. Following a recent organizational change, I am now available and eager to fully immerse myself in a dedicated coding role, contributing directly to product development for critical systems, such as those within naval defense. My passion lies in technical problem-solving and delivering robust software solutions from requirements to delivery. **Summary** Highly skilled and experienced Software Engineer with over 10 years of hands-on experience in developing complex multidisciplinary systems, specializing in .NET, .NET Core, and microservices architecture. Proven ability to participate in all development stages, from requirements definition and solution architecture to full implementation and delivery. ● Expertise in designing and implementing robust software solutions using .NET Framework, .NET Core, C#, and SQL, including experience with ground-based software and engineering tools. ● Strong background in micro-services architecture and cloud-based technologies (AWS & Azure), incorporating DevOps principles. ● Demonstrated customer-facing experience as a Solution Architect, adept at translating complex requirements into effective technical designs. ● Proactive, initiative-driven, with strong problem-solving skills and excellent interpersonal communication. ● Integrated modern AI-powered IDEs (Cursor IDE) into development workflow for enhanced productivity. **Major Accomplishments**

Led the dismantling and re-implementation of an ASP.NET MVC legacy system into a modern micro-service architecture, delivering a scalable and efficient solution within a short timeframe for a complex system.

Initiated and drove the development of an automatic process management system, which within two months saved the organization a significant 3rd party application purchase (one million dollars) by providing a custom, effective engineering tool.

Developed variant infrastructure components, creating innovative and scalable solutions that established a unified standard and generic features for all system screens, improving consistency and developer efficiency.

WORK EXPERIENCE

2025 - [RefereeX.com](#) - Building a service, developed in python, for sending notification for Israeli Football Referees integrated with Meta WhatsApp service. (Ongoing personal project)

2023-2024: R&D Team Lead & Scrum Master – Veritone (before Pandologic)

Veritone Hire empowers talent acquisition teams to advertise all of their jobs through a single vendor using the combined strengths of Broadbean and PandoLogic and Veritone AI. ● Held a leadership role with a significant 70% hands-on development contribution, focusing on critical services integrated with customers and 3rd party vendors for a complex recruitment platform. ● Drove code quality improvement, planning, and hands-on development in .NET, .NET Core, .NET Framework, C#, MsSql, Redis, DynamoDB, SQS, EC2, RabbitMq. ● Maintained and monitored servers in Production environments, participating actively in DevOps processes (AzureDevops CI/CD). ● Contributed across all development stages, from requirements to deployment, for high-availability systems. **2022: R&D Team Leader & Scrum Master –**

888 Holdings 888 is a leading company in the industry of online gaming. ● Hands-on contribution to the Platform Infrastructure team, focusing on creating new components and migrating legacy monolith systems to micro-services architecture for a large-scale gaming

platform. ● Developed extensively in .NET6, .NET Core, ASP.NET C#, Node.js, MsSql & Redis, implementing and integrating various AWS services. ● Participated in the full software development lifecycle, ensuring robust and scalable infrastructure solutions. **2019-2021: R&D Team Leader & Scrum Master – Align Technologies** *Align Technology is a global medical device company that is changing lives through better smiles.* ● Played a key hands-on role in an agile environment, contributing to the development of core company systems within a medical device context (complex multidisciplinary system). ● Deeply involved in the company's transition to micro-services architecture on a serverless infrastructure, contributing to design and implementation. ● Innovated R&D Tier3 support activities in a production environment, improving system stability and responsiveness. ● Developed using .NET Core, ASP.NET C#, MsSql, NoSql PostgreSQL, Redis & DynamoDB, alongside extensive use of AWS services including ECS, ELB, SQS, SNS, EC2, SSM, DMS, Lambda, CW, API, VPC, CI/CD, and automation. ● Gained significant experience with DevOps processes and managing global development efforts. **2019: R&D Senior Programmer/DevOps – Gimmonix** *Gimmonix is a travel technology company that empowers travel businesses to increase their revenue and boost efficiency, various solutions based on Azure cloud-based technology.*

R&D Full Stack Developer and key contributor in a DevOps team, focusing on cross-platform microservices systems and Azure cloud-based technologies.

Designed and implemented micro-services architecture, utilizing Dependency Injection principles and RabbitMQ message broker for robust system integration.

Hands-on experience with web application development using Angular, HTML, JavaScript & CSS.

Actively involved in the deployment and operational aspects, leveraging strong understanding of DevOps processes.

2007-2017: R&D Team Leader & Developer - SintecMedia *SintecMedia is a leading company in the Broadcasting market developing various products for Linear and Digital platforms.*

10 years of dedicated full-stack hands-on software development for complex broadcasting systems, demonstrating deep expertise in .NET Framework development.

Functioned as a Solution Architect for a core system module, defining technical direction and ensuring architectural integrity from concept to deployment.

Led all software aspects of projects (E2E process) from research, planning, architecture, design, implementation, testing, and deployment, aligning perfectly with "participate in all development stages, from requirements to delivery."

Hands-on development for approximately 50% of the time in .NET C# and Oracle using PL/SQL, contributing directly to core product features and stability.

Engaged directly with customer issues, provided client on-site support, and conducted business reviews, demonstrating comprehensive project involvement.

Community Activity 2002-2017: Football Club General Manager – Shikun Vatikim
Ramat-Gan semi-professional football club in the Israeli football federation.

General Manager

Responsible for all financial aspects.

Responsible for all bureaucracy procedures with various authorities.

EDUCATION B.Sc. in Computer Science, 2001 | The Open University
